Hanger Rod Canopies

We custom manufacture our pre-finished aluminum hanger rod canopies to meet your specific needs for high performance architectural applications. While we offer different types of hanger rod canopies to meet various performance and economic requirements, our GHRC 200 & 300 Series, Louvered, and Cantilevered canopies incorporate these premium features:

- Constructed with durable, weather resistant aluminum to prevent corrosion and provide low maintenance upkeep.
- Finished with a super durable powder coat with superior weather resistant properties for high performance outdoor architectural use.
- A variety of decorative fascia options and escutcheon plates are available for customization to meet any design requirement.
- Job specific engineering available.

GHRC 300 SERIES

Our premium hanger rod canopy is an all extruded aluminum canopy designed to withstand large wind loads, large snow loads and to offer maximum hail damage protection. This canopy allows for the largest size projections and offers greater spans between the rods.

GHRC 200 SERIES

Our 200 Series canopy offers the perfect combination of strength and affordability. This canopy utilizes an extruded gutter/fascia and roll formed decking to allow for numerous attractive design options at a cost-effective price point.

GHRC LOUVERED

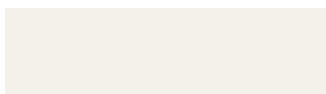

Our louvered canopies are sunshade awnings that offer a beautiful design element while allowing filtered light to enter interior building spaces. These unique canopies can be placed vertically or horizontally to meet diverse design requirements.

CANTILEVERED CANOPIES

Our cantilevered canopies utilize an internal support system to provide shade while offering a sleek, modern design aesthetic.

Commercial Fabric Awnings

Our commercial fabric awnings provide shade, weather protection, and signage all in one easy to customize package. The versatility, affordability, and ease of installation of fabric awnings make them a preferred architectural design element for adding curb appeal and branding to storefronts, restaurants, shopping centers, and apartment complexes.

RETAIL AWNINGS

Attract the right kind of attention to commercial buildings and storefronts with awnings that add curb appeal with colorful fabrics in a variety of design options. Branding is easy and economical with our state-of-the-art graphics technology that ensures high quality graphics with vibrant colors that won't peel.

For more details and examples, please visit the [Fabric Awnings page](#) on our website.

COMMERCIAL RETRACTABLE AWNINGS

Our most versatile commercial awning option, commercial retractable awnings provide branding, curb appeal and shade while offering the capability to be retracted for convenience when not in use.

COMMERCIAL PATIO AWNINGS

Our patio awnings make it possible to expand the size of a business. Add cost effective, weather protected, additional seating space to a restaurant or establishment with commercial patio awnings that provide protection from the rain and sun.

SGS GRAPHICS MACHINE

Developed and field-tested by awning and sign professionals, this state-of-the-art system allows us to integrate your custom logo designs and multicolor graphics directly into the awning fabric resulting in vibrantly colored graphics that will not peel.

Sunbrella Fabric Options

We have a large selection of textured, solid and striped fabric options that can all be viewed on the [Sunbrella Fabric Options](#) page on our website.

For more details and examples, please visit the [Fabric Awnings page](#) on our website.

Metal Awnings and Canopies

Our metal awnings and canopies are known for their durability, functionality and long-lasting weather protection. Our commercial metal canopies and awnings allow for larger coverage areas over our fabric awnings and they can be host attached or free-standing. Pre-finished with durable, baked enamel or our high-performance powder coating for excellent weather resistance, no on-site

painting is ever needed. With multiple colors, post sizes and beam sizes available, we custom manufacture designs that meet your specific requirements and that will last for years.

For more details and examples, please visit the [Metal Awnings page](#) on our website.

STANDING SEAM METAL AWNINGS

Standing seam awnings add a distinctive finishing look while providing shade and weather protection. Manufactured with durable materials that won't rust or corrode, they are ideal for long-term architectural and industrial applications.

INDUSTRIAL METAL CANOPIES

Functional, durable and manufactured using aluminum to prevent corrosion, our industrial metal canopies are ideal for covering machinery, loading docks, entryways, and employee break areas. Offering high-performance wind and snow loads and large coverage areas, our industrial metal canopies provide long-term weather protection.

Walkway Canopies

Our walkway canopies provide weather coverage for high traffic walkway areas and are ideal for schools, hospitals, and retail centers. Available in fabric or metal and custom manufactured to meet your specifications, they can be host attached or free-standing.

FABRIC WALKWAY CANOPIES

Fabric walkway canopies can be custom fabricated to cover even the most complex applications and are a durable yet economical alternative to metal canopies.

METAL WALKWAY CANOPIES

Our metal walkway canopies are long-lasting, durable, manufactured with aluminum and structurally designed to withstand large snow and wind loads.

Bahama Shutters

BAHAMA SHUTTERS

This beautiful “Coastal” designed awning option provides a unique architectural element to add curb appeal to any building, apartment complex or retail center. Manufactured with non-corrosive aluminum and finished with a super durable powder coating for excellent weather resistance, these shutters provide an exceptional finishing touch.

Specialty Products

When a special project calls for an extraordinary architectural accent or detail, we can custom manufacture the metal feature to meet your requirements.
